

# Aircraft Engineer's Maintenance Experience Logbook

Suitable also for application for EASA Part 66 license initial issue / amendment

## **Preface**

This logbook complies with EASA Part 66 requirements and can be used by an aircraft engineer for the application for initial issue/amendment of a Part 66 aircraft maintenance license. It can be used at the same time for the maintenance experience of a person through all of his employment as an aircraft engineer.

The format and layout of the logbook is designed to enable a methodical and progressive recording of ongoing work experience by the user, thereby enabling a quicker and more accurate assessment of the user's technical knowledge and experience by a regulatory authority, employer or assessor.

## **Instructions for use**

- All blocks must be filled in ink. Each line can accommodate one maintenance task thus each page can be used for 10 tasks.
- Preferred date format is DD/MM/YYYY (Block 1).
- Job/WO reference number (Block 4) is necessary as a proof of actual maintenance performed on the aircraft.
- In Job Description and document reference (Block 7) a full description shall be entered including the type of work (e.g. replacement / inspection /check /cleaning etc).
- Each line must be signed and stamped (Block 8) by the supervisor/authorized person by the maintenance organization. This person must be a holder of a valid EASA Part 66 aircraft maintenance license.
- The Logbook Owner must sign and ask for his company stamp at the bottom line of each page.
- All pages must be numbered in sequence at the lower right corner of each page.
